Transport for Society

2011
annual summit

Dear Friend,

Every year, the International Transport Forum's annual summit is the place for a vibrant exchange of ideas about recent developments and the future of transport. As the unique global platform that brings together Ministers, decision-makers, experts and practitioners from around the world and from all modes of transport, the International Transport Forum has established itself as the leading global mobility event. This year, we will focus our debate on the theme of *Transport for Society*.

Transport is intrinsic to societal activity, and one of its greatest enablers. It allows people to reach their workplaces; provides individuals with access to education and services; and is increasingly important for leisure. It drives trade and creates jobs.

A world without the very real daily benefits of mobility has become unimaginable. But all too often transport is taken for granted, and societal demands on transport are constantly increasing. Transport systems must be adapted to better serve us all, but these systems are complex, and not easy to change. Opportunities for more open, effective dialogue on the development of transport systems should be pursued in order to facilitate a better understanding throughout society of transport issues.

So how can transport provide even more benefits for our citizens and societies? How can all transport modes – for passengers as well as freight – contribute to growth that is sustainable?

Transport Ministers and business leaders, mayors of major cities, top researchers and representatives of non-governmental organisations will examine these strategic issues at the International Transport Forum's annual summit on 25-27 May 2011 in Leipzig, Germany.

We invite you to join us in Leipzig and help us to advance the global transport policy agenda with your presence and participation.

José Blanco López
Ministro de Fomento
(Transport), Spain

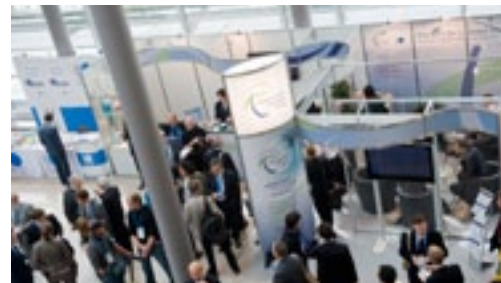

Dr. Peter Ramsauer, MdB
Federal Minister of Transport,
Building and Urban Development,
Germany

Jack Short
Secretary General,
International Transport Forum
